Your responsibilities will include:

- Improving and extending the Service Architecture of our company
- Providing and ensuring our operations on a three tier development environment
- Participating and contributing to a high performance, high security server environment
- Evaluation and implementation of new tools and technologies
- Close cooperation with CTO, product and project management, web design and external partners

Your Profile:

- You are an AWS expert including IAM, Cognito, VPCs and Amazon Identity, not to mention EC2, RDS, …
- You know your UNIX and when things go south you write your own little magic script
- You have experience in running and ensuring high availability services that scale properly
- GDPR compliance is something you understand as mandatory not nice-to-have
- Teamplayer, proficient in English, good communicator

Our offer:

- You are part of a young, motivated and forward-thinking team of professionals
- You take quality serious? So do we and therefore we also make time for it.
- You got ideas? Perfect. We give everyone the opportunity to contribute their own ideas, styles and experiences
- We are flexible, all the way down to our project management – you guessed it – scrum it is.
- We offer attractive development opportunities in our fast-growing company
- In your office in the heart of Vienna you chose your own weapon (MacBook Pro, Thinkpad, you name it)
- A starting salary from € 3,000 gross / month on full-time basis with willingness to overpay depending on qualification and work experience
